

REVIEW
of the educational and scientific program "Economics" of
the third (educational and scientific) level of higher education
in the major 051 Economics,
the area of knowledge 05 "Social and behavioral sciences"
Kherson State Agrarian and Economic University

In our opinion, the educational and scientific program for training postgraduates of the third (scientific and educational) level of higher education in the major 051 Economics is successfully structured, comprehensive and unique. The structure of the program for training Doctors of Philosophy reflects that it is based on the research of many years and the achievements of the university scientific schools, and the study of modern economics is offered from the standpoint of alternative currents of economic science on the basis of thorough study of compulsory and optional disciplines.

The content of the educational program has a clear structure. The list of components of the educational and scientific program and their logical sequence correspond to the quality criteria of the program. These components are educational and scientific work, practical training. The availability of teaching practice as an obligatory component of practical training corresponds to the profile of the educational and scientific program and its orientation, in particular. The content of the educational and scientific program corresponds to the subject area of the major "Economics". The structure of the educational and scientific program provides an opportunity for the formation of an individual educational trajectory, in particular, through an individual choice of disciplines from the proposed catalogue.

It should be noted that, according to the requirements for the dissertation work in the educational and scientific program for the degree of Doctor of Philosophy, a solution to an urgent scientific problem in the field of economics or on the verge of several fields is proposed that indicates the possibility of conducting interdisciplinary and transdisciplinary research. The latter is a key global trend in scientific research, it significantly expands the boundaries of the obtained scientific results and the original contribution to the knowledge in economics by the researchers of the PhD program in solving an urgent scientific problem.

The educational and scientific program contains regulatory, competence, qualification, organizational, educational and methodological requirements for training Doctors of Philosophy in the area of knowledge 05 Social and behavioral sciences in the major 051 Economics, reflected in its content. The program follows the competence-based approach to training Doctors of Philosophy in accordance with the requirements of the Draft Higher Education Standard, provides forms of control measures and criteria for evaluating higher education seekers that are clear, understandable, and make it possible to establish the achievement of learning outcomes by a seeker of higher education. The university has clear and understandable policies, standards and procedures for upholding academic virtue. In

particular, all scientific works and Ph.D. theses must undergo a plagiarism check in the university library according to the approved procedure and terms.

The forms and innovative teaching methods declared in the program contribute to the achievement of the goals and program learning outcomes declared in the educational program, meet the requirements of student centrism and the principles of academic freedom.

KSAEU has a favorable educational and scientific environment and appropriate material resources. The internal system maintaining the quality of educational activities at the university ensures the monitoring and periodic revision of the educational program, the availability of necessary resources for organizing the educational process, the publicity of information about the educational and scientific program.

The content of the educational program by competencies and learning outcomes comply with the purpose of the educational program and the demands of the main stakeholders.

So, the peer-reviewed educational and scientific program for training Doctors of Philosophy in the major 051 Economics at the Kherson State Agrarian and Economic University is unique, fundamental, high-quality and provides theoretical and applied training for postgraduates capable of scientific and professional activities and can be accepted for implementation.
